

# POLVORETE

2019

## HISTORY

Polvorete is a wine born to make the wonders of the Godello grape known the world over. A wine full of joy, youth and fun, which is above all easy to enjoy.

## CHARACTERISTICS OF THE HARVEST

The weather conditions in El Bierzo in the year 2019 favoured very high grape quality. There was abundant rainfall in the flowering period, which affected production quantity. Later on, at the end of spring and especially in summer, there was a great increase in temperature which, combined with the scarce rainfall, caused the grapes to enter the winery with a high sugar concentration.

## WINEMAKING PROCESS

Fermented at controlled temperature in stainless steel deposits.

## TASTING NOTES

A wine of a straw yellow colour, clean, bright and with medium intensity. Very expressive on the nose with notes of fresh white flowers and fruit. The passage through the mouth is fresh and persistent, but without losing the balanced acidity typical of the variety.

## TECHNICAL DETAILS

**APELLATION:** El Bierzo

**VARIETY:** 100 % Godello
